PP8 PLUS LIFTS INCLUDE

PADDED THREAD-UP ADAPTERS

FOUR (4) EACH 2 1/2" ADAPTER EXTENSIONS

Two post lifts are a versatile shop fixture!

Two post lifts work on the principle of pushing two hydraulic cylinders upward. Hence the "lift" part of the equipment description. Cables keep the carriages that hold the arms in sync with each other, they're sometimes referred to as equalization cables. What does this all mean, it means your lift goes up in a level plane. One difference in our models shown is how the cables are run to each column. Either above head or at ground level. Two post lifts have locks that you can lower the carriages down to, the carriage is the part that holds the arms. The lift arms are noted by their yellow color in our photographs.

When you're ready to make the best investment for your garage.

You can purchase directly from our extensive network of warehouses that are conveniently located throughout the USA and Canada. Our warehouses have a full inventory of repair parts and accessories, and Direct Lift backs them up with parts and accessories inventory at our Madison, Indiana headquarters. You can be assured your new Direct Lift will remain in service for years to come.
